

ARYAN RAJ

BACKEND DEVELOPER — Python/Django — APIs Databases — AI/LLM

About Me

Backend Developer with 2.6+ years of experience designing and maintaining robust backend systems. Skilled in Python, Django, RESTful APIs, MongoDB, PostgreSQL, Redis, and AI-driven applications (RAG / Agents / LLMs). Experienced in building scalable microservices, database schemas, and optimized APIs for high-performance web applications. Strong problem-solving and collaboration skills with a data-driven approach.

Contact

Email: aryanraj844101@gmail.com

Mobile: +91 7970327657

Skills

Python, Django, RESTful API Design
MongoDB, PostgreSQL, Redis
RAG / Agents / LLMs Integration
Microservices Architecture, ETL Pipelines
Caching Performance Optimization
Version Control: Git, CI/CD pipelines
Debugging, Troubleshooting, Problem Solving
Data-driven development, Analytical thinking

Tools

VS Code, IntelliJ, Docker
AWS, Heroku, Vercel, Redis
Postman, Jira, Slack, Git/GitHub

Education

- **M.Sc. in Computer Science**
2024 – 2026
Central University of South Bihar, Gaya, India
- **BCA (Bachelor of Computer Applications)**
2018 – 2021
Birla Institute of Technology, Mesra, Ranchi, India

Projects & Portfolio

My Portfolio Website, [click here](#)

Achievements

- 2nd Place – Coding Competition, CUSB (2024)
- 2nd Place – Poster Competition, CUSB (2024)

Experience

Chetu Inc — Software Engineer

Sept 2023 – Apr 2024

- Developed scalable healthcare web apps with Python, Django, Node.js, and PostgreSQL.
- Built REST APIs, designed database schemas, and deployed backend services on AWS.
- Ensured code quality with debugging, testing, and following best coding practices.

Maison D' Auraine — MERN Full Stack Developer

Jun 2023 – Sept 2023

- Developed backend services using Node.js and integrated with MongoDB and Redis.
- Optimized API performance and implemented caching for high traffic operations.

Prodapt Solutions — Software Engineer

Oct 2021 – Jun 2023

- Designed full-stack telecom applications with Python/Node.js backend.
- Built efficient ETL pipelines, API services, and database optimization queries.

Key Projects

Backend Knowledge Retrieval System — Personal Project
Developed RAG-based LLM backend with Django, Redis caching, and PostgreSQL for fast data retrieval.

E-commerce Backend Platform — Maison D' Auraine
Built scalable APIs and microservices with Python/Django, MongoDB, and Redis, improving response time by 30%.

Healthcare Data Pipeline — Chetu Inc
Implemented optimized REST APIs, database schemas, and deployed on AWS, ensuring reliability and security.
