

Aryan Raj

Software Engineer

AI-focused Software Developer with 3+ years of experience in designing, developing, and integrating intelligent applications using Python, Java, and REST APIs. Proficient in building and deploying ML/NLP solutions on AWS and integrating SDKs for scalable cloud-based systems. Experienced in backend engineering, API development, and automation within Agile/Scrum environments. Passionate about leveraging large language models, NLP tools, and AI-driven automation to enhance product performance and user experience.

WORK EXPERIENCE

Project Internship

Indian Institute of Technology, Patna

01/2026 - Present

Patna, Bihar, India

- Working on **AI in Sports** research, focusing on **Agentic AI architectures**, **ETL**, **LLM fine-tuning**, and domain-specific intelligence for sports analytics and decision support.
- Designing experimental pipelines for training and evaluating language models on sports-related datasets.

Software Engineer

Chetu, Inc

09/2023 - 04/2024

Noida, Uttar Pradesh, India

- Engineered and maintained **Python-based backend services and REST APIs** for AI-enabled healthcare and financial applications.
- Integrated **third-party SDKs** and automated end-to-end workflows to streamline intelligent process orchestration.
- Collaborated closely with data science teams to support **NLP pipelines**, model integration, and inference workflows in production systems.

MERN Full Stack Developer

Maison D' Auraine

06/2023 - 09/2023

Bengaluru, Karnataka, India

- Developed and deployed scalable web applications using **Node.js and React.js**, with seamless REST API integration. Contributed in Agile sprints, collaborating with UI/UX teams to translate designs into functional features.
- Built **AI-driven chatbot prototypes** leveraging Python NLP libraries to improve customer interaction and engagement.

Software Engineer

Prodapt Solutions

10/2021 - 06/2023

Bengaluru, Karnataka, India

- Designed and optimized **microservice-based backend systems** for telecom clients using **Python and SQL**.
- Automated backend processes and monitored **API integrations** to enhance data consistency and system reliability.
- Supported CI/CD pipelines and ensured high availability across development, staging, and production environments. I developed user-friendly solutions that boosted sales by **20%**, **driving innovation and growth**.

ACHIEVEMENTS

- I won 2nd place in a Coding Competition during my first year of MSc Computer Science in 2024.
- I won 2nd place in a Poster Competition during my first year of MSc Computer Science in 2024.

EDUCATION

MSc Computer Science

Central University of South Bihar, Gaya, India

07/2024 - Present

BCA(Bachelor of Computer Applications)

Birla institute of technology, Mesra, Ranchi, India

06/2018 - 06/2021

70.60 %
